Dear Thomas,

"The June 4th Cantor Fitzgerald Uranium Conference highlighted significantly bullish fundamental shifts in the supply/demand equation for U308. Sanguine comments and presentations by analysts and the major uranium producers underscored the propitious timing of the MCP Symposium on Uranium. Our highly knowledgeable speakers will set the stage for an educational day about Nuclear Power and its raw material, and our presenting companies will offer compelling value propositions for small cap investors to profit by investing in them. Join industry observers, research analysts and your investment peers on June 23rd to learn about the newly emerging bull market for Uranium."
